Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by either of Merriam, Johanson or Duer.

Each of the references show structure as claimed, including a seat, back, uprights and struts, and each reference discloses the chair's ability to stand upright when in the folded position.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 14 are rejected under 35 U.S.C. 103(a) as being unpatentable over either of Merriam, Johanson or Duer, in view of Lovegrove et al and Day.

To have formed the chairs of either of Merriam, Johanson or Duer from conventional plastic material, is considered a matter of design choice, and would have been an obvious modification to one with ordinary skill in the art.

The patent to Lovegrove et al shows a backrest formed from a plastic material, wherein the back is formed of a front surface with a top flange extending

away therefrom. To have formed the backrest of Merriam, Johanson or Duer in such a manner, wherein a plastic material is utilized, would have been well within the level of skill in the art, as Lovegrove et al shows such to be a conventional and well known means of forming a support. The use of reinforcing gussets for such a lip or flange member is shown to be known in the art by Day (figs. 2,3), and to have provided such for the backrest flange of the above combination would have been obvious to one with ordinary skill in the art, thereby strengthening the support.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Holmes, McKinnie, Hoven et al, and Hultman show various features of the invention.
